

## SOLAR ENERGY FOR YOUR BUSINESS

**GreenSun** is a turn-key solar developer for commercial-scale solar solutions.

**Our goal** is to make it easy for businesses and organizations to install solar energy at their facilities.

**We create opportunities** for our customers to manage their energy more effectively and lead the way to a cleaner future.

**Bottom line**, GreenSun can help you go solar in a way that's real for the environment, meaningful to your customers, and financially feasible for your company.

## OUR SOLUTIONS

Solar energy is an effective way for businesses to take control of a significant portion of the energy they use. Whether you want to purchase a system, finance a system, or need help evaluating your options, we can help.

### Purchase your system

Solar can be complicated. It doesn't have to be. We'll provide you with a turn-key solution – system payback ranges from 5 to 9 years.

### Lease your system

Lease financing is available for most customers.

### Just buy the electricity

Using our Power Purchase Agreement (PPA), you can buy clean solar energy from solar panels installed at your site, rather than paying to have a system installed. This is GreenSun's **Onsite Solar Utility™**, available for highly creditworthy clients.

Financing your system this way has several advantages, which include:

- Going solar without any capital expenditure
- Hedging against rising electricity prices with a long-term contract
- Enabling your firm to go green, without impairing profitability

### Go solar systematically

GreenSun is equipped and ready to help you evaluate your options. As part of our **Solar Strategy Package™** we'll look at your company's strategic goals, project economics, incentive availability, PR opportunity, solar resource, and other factors to help you plan the best approach to rolling solar out across your facilities.

## MAXIMIZE THE MARKETING VALUE OF SOLAR

Solar is more than an energy management tool. As a key component of our **Solar Strategy Package™**, we'll design and deploy a custom Community Outreach Plan for your firm to help you communicate your commitment to improving the environment. In this way, GreenSun helps you maximize the benefits of going solar.

The GreenSun seal will display prominently in your store entrance, marketing materials, and other high-visibility locations.
